and repairs always on hand. Office next  
door to Queen's Hotel.

## MR. McDONALD'S SPEECH

### The Member for North Qu'Appelle Seconds Motion of Address.

Mr. McDonald in seconding Dr. Patrick's motion, thanked the house for the honor bestowed upon his constituency, being one of the oldest in the Territories, on his being asked to second the Address in reply to the Speech from the Throne of the first responsible government in the Territories. The Speech brought forcibly to his mind that we had this year joyfully celebrated the sixtieth anniversary of Her Majesty's accession to the throne, and we had to congratulate ourselves that during the last half of this reign we had become a portion of the Dominion which has occupied so prominent a part in the Jubilee celebrations. The abundant and profitable harvest which has been so widely distributed throughout the Territories, was, he said, a good harbinger for the future prosperity of the people of this country; and the results of this season had proved that the main industries of the land are no longer in an experimental stage. The development of the unexplored portions of the Territories was a matter that should receive the encouragement of the Assembly and every assistance should be offered to those in that district in their efforts at development and in the transporting of supplies. This could be mainly done by the opening up of the means of communication through the already settled portions of this country, thereby giving an all through Canadian route and bringing their business more within the reach of the people generally. It should not be forgotten that the prosperity and progress of a country, as had been well said, did not depend only on the wisdom of its statesmen, on the number of its institutions, on its higher education, but also on the facilities of communication whereby the inhabitants were enabled to exchange their products, their commodities and even to exchange their views and their thoughts. He congratulated the house, and more particularly the members of the assembly who had been in the house in the troubled times of the past, on now having the responsible government, which they so long contended for, and which is so acceptable to the people; and trusted that any future moves in this direction would continue to be on the same progressive lines. Let us hope, he said, that it is the beginning of a new era, let us hope that moderate men, irrespective of personal predilections, will join hands in making the constitution of the Territories one not only of which we need not be ashamed, but one which shall be the envy of the remaining portions of the Dominion. Respecting the reorganization of the offices of the government, he hoped the work would be carried on with the same spirit which had characterized the other acts of the government, and that they would remember that all good and honest government must largely depend on the permanent tenure of the civil service. It was essential that the Ordinances should be thoroughly consolidated and amended by striking out all legislation which has proved unnecessary, and enacting further legislation to meet the needs of the Territories as well as placing them in a more compact form. A great deal of trouble has arisen in the past through people not having cognizance of the amendments as well as of the original ordinances. This in future would, to a great extent, be done away with.

It must, continued Mr. McDonald, be a matter of great satisfaction to the assembly to have had during the past year a new and improved system of public works in force, under qualified engineers. Public works being the second largest item of expenditure in the accounts, it was to be commended that this desirable improvement had been introduced. It had been in the short space of time during its operation a great benefit to individual districts. The policy of the government in carrying out the larger and permanent works and confining the smaller ones to municipalities and statute labor districts should meet with the approval of all. He trusted those districts would continue to increase and receive the support of the government. With this department of the public service the water question must be connected. During long anxious years settlers had been struggling against hope in endeavoring to remedy the defects of this problem. The old system had not met the necessities of the country; the drawbacks were such that no single settler could undertake the expense of securing suitable means to search for and secure water. The public works department would therefore be compelled to take this matter upon itself and provide the means for removing this great hindrance. No reasonable expense should stand in the way. The country could not afford to lose any settlers, and one who had gone through experience of the past ten years would rest assured that no better immigration policy could be inaugurated by the assembly than that of making the lot of those in the country contented and profitable as far as lay in their power.

With regard to the expropriation of lands for new roads, he said, the assembly should go very slowly. There should be no expropriation of lands for roads merely to make a short cut from any persons farm or settlement, or even from any in titution to a central point. These superfluous roads would prove a source of great inconvenience to the owners of the farms they pass through. The Dominion system of surveys has been considered to be the best and it should be adhered to as closely as possible. The only

deviation allowed should be where there was some engineering difficulty in the way.

The placing of the complete control and audit of Territorial funds on a sound basis would give the government the confidence of the house and of the people. The relations of the treasury department with the auditor should be clearly defined.

The original election ordinance in force in the Territories, although at one time an experiment, might be now said to have gone beyond that stage. Although entirely different in many respects from the election law of the provinces, it has been found generally satisfactory. It was to be trusted therefore that the government would so maintain the ordinance in such condition that it cannot be worked in any but a fair way.

The stock ordinance on the statute book has not been brought into force effectively. In bringing forward the new bill, he hoped the government would not sacrifice the interests of the eastern part of the Territories to those of the western portion, and that means would be provided for the issue of stock coming into as well as leaving the Territories. This being one of the largest industries in the country, should receive more attention than it has done in the past.

The Territories had complete control in dealing with the liquor question. The liquor ordinance should receive the careful attention of the assembly, and it was necessary for the credit of the country that the powers contained in the ordinance should be taken advantage of. The system of inspection at present in force had proved expensive and unsatisfactory. Unless the part of the ordinance was carried out effectively it was impossible how to let the conditions of the license were a heavy burden.

The experience in this country of municipal governments, continued Mr. McDonald, could not be said to have been successful. With so large an amount of unincorporated land in various districts it would almost seem advisable to create increased powers upon the formation of municipalities. The present system of statute labor has been paid the direction of all works and the expenditure of the people's money, thereby under their control, and should receive recognition. The policy of the government in assisting and undertaking the large work in the Territories should be sufficient for the needs of the people for many years to come. He noted with pleasure that the appointment of justices of the peace had been placed in responsible hands. He suggested that in a thinly settled country such as the Territories, it would, perhaps, be well for the government in considering the proper qualification of magistrates to also take into consideration, where a man of character and ability is found, but who lacks the necessary property qualification whether or not it would be advisable to accept suitable salaries in this respect.

The assembly in its attitude toward foreign corporations should be fully alive to the interests of the people, without placing any barriers in the way of introducing capital. If we wanted foreign capital for the development of the country we must not place any insurmountable obstacles in the way of its coming in, but at the same time we had to receive from them a tax commensurate with their business.

In conclusion, Mr. McDonald thanked the house for the considerate attention they had given him. He could only say he had much to look forward to in this country if we were wise and prudent in profiting by the past experience of other people, and avoiding the quicksands into which indiscrete politicians may endeavor to push us. (Applause.)

## Will Lose His Feet.

From the Winnipeg Free Press we learn that Chas. Gatty, who was found lying near the track here two weeks ago in a perishing condition, will have to lose his feet. When he left here for the hospital the frostbites were not thought to be serious, but owing to his weak condition gangrene set in. Mr. Gatty came to Qu'Appelle several months ago from Deseronto, Ont., and has been employed about town up to the time of his misfortune. He was a quiet, inoffensive and obliging man, an army pensioner, and it is supposed that when he drew his pension he took this way of celebrating the event, which will cost him so dear.

## Murder at Leduc.

Edmonton, N.W.T., Nov. 1.—Saturday night the mounted police brought in a fifteen-year-old boy named Belther, who was committed for trial for the murder of a companion named Redmond, aged seventeen, at Leduc. On Thursday the boys were present at a harvesting bee and got wrestling. Redmond threw Belther twice. Belther got on a straw stack and dared Redmond to come up. Redmond got on the stack, when Belther drew a knife and stabbed him in the neck. Redmond died twenty hours after.

Saturday afternoon P. D. Campbell's son, aged eight, fell from a shed roof and broke his thigh.

## Fort Qu'Appelle.

The Rev. F. W. Johnson and family leave on Thursday for their trip to the Old Country. There is no more highly esteemed clergyman in the diocese, and while everyone wishes him and Mrs. Johnson a pleasant trip among their English relatives and friends, his return here will be looked forward to with anxious expectation.

The Lebert Industrial school is now out of quarantine. Over fifty cases of scarlet fever have been under treatment without the loss of a single patient, which certainly reflects great credit on both the medical officer, Dr. Seymour, and the self-sacrificing nursing Sisters and other officials.

Our old friend and former reeve, Mr. John Nicholls, has taken the editorial control of the Gendell Star. Mr. Nicholls is an apt writer and will no doubt get out an interesting paper, in which the C.P.R. will not fail to come in for ample criticism.

On Monday in the legislative assembly our M.L.A., Mr. D. McDonald, had the honor of seconding the address in reply to the speech from the throne.

The Rev. M. Winter takes charge of St. John's and outlying parishes during Mr. Johnston's absence.

There are several cases of scarlet fever in town and the public school has had to be closed.

## Attempted Suicide.

Oak Lake, Nov. 3.—A young lad named Hyde, living south of here, attempted to shoot himself late on Monday evening. His face is badly torn by the shot and Dr. Wright is sending him to the hospital at Brandon to-day. Hyde's father was committed for trial at Virden on Monday on a most heinous charge.

—On Monday evening on the arrival of the train from the west, a young man was given into the custody of Sergt. Fyffe, charged with beating his way on the railway. He was brought up before Magistrate Henley on Tuesday morning, and having satisfactorily explained matters was allowed to depart, as he had a ticket and money awaiting him at Griswold.

Ill health is a luxury that only the rich can afford, and that no one can enjoy. Every woman is not so situated that she can be an interesting invalid, or rather, an uninteresting invalid, for there never was an interesting one.

The woman who suffers from weakness and disease of the distinctly feminine organs is certain to become an invalid. No woman can suffer in this way and be a healthy, happy, amiable wife and a competent mother. Troubles of this nature sap the strength, rack the nerves, paint lines of suffering upon the face, destroy the temper, make the once bright eyes dull and the once active brain sluggish, and transform a vivacious woman into a weak, sickly invalid.

The one sure, speedy, permanent cure for all disorders of the distinctly feminine nature is Dr. Pierce's Favorite Prescription. It acts directly on the delicate and important organs concerned, and makes them strong, healthy, vigorous and elastic. It cures the internal ulceration and inflammation that give rise to a debilitating drain on the system. It is the best medicine for overworked, "run-down" women.

"About six years ago my wife became afflicted with female weakness," writes the Rev. J. J. Coppedge, of Elmo, Kaufman Co., Texas. "She could not stand on her feet or get in any position in which she did not suffer great pain. She despaired of ever again being well. She took six bottles of Dr. Pierce's Favorite Prescription and has been well and happy for twelve months."

It is a druggist's business to give you, not to tell you, what you want.

Thirty-one one-cent stamps cover the customs and mailing of a paper-covered copy of Dr. Pierce's Common Sense Medical Adviser. Cloth-bound, 50 stamps. Send to Dr. R. V. Pierce, Buffalo, N. Y.

PUBLISHED EVERY THURSDAY  
At the Printing Office, Qu'Appelle Station,  
Assa., N.W.T., Canada.

Subscription Price \$1 per annum in ad-  
vance; \$1.50 if not so paid.

### ADVERTISING RATES.

Business cards as per arrangement ac-  
cording to space.

Transient Ads, such as Legal Notices,  
By-Laws, Tenders, Notice of Meetings, etc.,  
10 cents per line first insertion, and 5 cents  
each subsequent insertion, solid nonpareil  
measure.

Reading notices in local columns 10 cents  
per line each insertion.

Advertisements of Wants, To Let, Found,  
Astray, etc., 50c for first insertion, 25c for  
each subsequent insertion. This class of  
ads. must be accompanied by cash to insure  
publication.

Church Notices and Society Entertain-  
ments from which a revenue is to be derived  
will be charged for at the rate of 10 cents  
per line.

Rates for Commercial, Contract and Per-  
manent advertisements will be furnished on  
application.

A liberal commission allowed to parties  
willing to act as agents for us. Write for  
terms.  
S. T. SCOTT,  
Editor and Proprietor

THURSDAY, NOV. 4, 1897.

### A FAIR START.

The five members of the North-  
west government, and a candidate  
who offered on a ticket of square  
support of them and their policy,  
have been returned by their var-  
ious constituencies by acclamation.  
These constituencies are fairly well  
scattered, two being in Alberta,  
two in East Assiniboia, one in West  
Assiniboia and one in Saskatche-  
wan. Their expression may be  
taken as a fair indication of the  
whole country. Thus the new  
Executive Council assumes the  
duties of government under the  
most favorable auspices. Its per-  
sonnel and the methods it conceives  
to be wise for the management of  
affairs seem alike to have gained  
the approval of the people as a  
whole.

The Executive Council has its  
future in its own hands. If it con-  
ducts the business of the country  
impartially and honestly on the  
lines laid down by Mr. Haultain  
and his colleagues in their recent  
addresses, we believe it will merit  
and continue to hold the support  
of a very large majority of the  
people. The country wants neither  
flashy nor trashy government.—  
Regina Leader.

## HEAD A MASS OF SCABS

COULDN'T GO NEAR THE STOVE.

Treated by Different Doctors.

CURED BY DR. CHASE.

The most intractable and distressing  
skin diseases which defy all manner of  
treatment—even the best medical skill—  
are readily cured by Dr. Chase's Ointment.  
MRS. JOS. QUERIN, hotelkeeper's  
wife, at Ethel, Ont., was troubled with  
Eczema of the Head and Face for about  
9 years, and was so bad at times she  
could not go near the hot stove to do her  
cooking. Her head was one mass of scabs,  
and although she treated with doctors it  
kept getting worse. On hearing of Dr.  
Chase's Ointment, she got some, and was  
delighted to find the first application do  
her good. She used two more boxes of  
the Ointment. It is now free from disease,  
can do her own cooking, and would not  
begrudge \$200 for the good it has done  
her.

Price 60 cents a box, at all Dealers,  
or Edmanson, Bates & Co., Toronto, Ont.

RIGHT thinking Liberals here  
condemn the action of the minister  
of public works in dismissing Mr.  
Gisborne from the superintendency  
of N.W. telegraph lines. They  
claim it is only fair to give Mr.  
Gisborne timely notice, if his ser-  
vices are no longer needed. Mr.  
Gisborne's case, as well as that of  
Mr. Tennant, at Gretna, will likely  
occupy considerable time of the  
house at the next session, and we  
hope to see the matter thoroughly  
ventilated and justice done these  
gentlemen.

LAST week, a young man on  
pleasure bent started out with a  
small rifle to hunt the wild cat in  
its den—the back yard of an estab-  
lishment in town. He shot several,  
and to make sure they were dead,  
shot them again. This is rather a  
dangerous pastime in the heart  
of a crowded town like our own,  
and someone will again be hurt if  
it is not put a stop to, and that  
promptly.

THE legislative assembly has not  
up to now started its game of foot-  
ball. Indeed, the teams are incom-  
plete, some of the big kickers not  
having yet put in an appearance.  
The Haultain Harrassers talk big  
of what they are going to do, but  
the old parliamentary hand may be  
trusted to use his foot with effect,  
when the ball is once placed.—  
Sport.

### The World's Favorites for Dye- ing Light, Medium and Heavy Goods.

Diamond Dyes do a range of  
work far beyond the possibilities  
of soap grease and crude package  
dyes. The common dyes on the  
market are deceptive in character  
and composition; they are made to  
sell, not to give guaranteed satis-  
faction. The majority of the colors  
of soap grease and crude package  
dyes are so weak that they will  
hardly stain the hands. Diamond  
Dyes give colors to light, medium  
and heavy materials that are as  
fast as a rock, and last as long as  
the goods hold together. The  
heaviest tweeds and cloths can be  
dyed with Diamond Dyes. Soap  
grease and imitation package dyes  
dare not attempt such work, be-  
cause the colors are not sufficiently  
penetrating and powerful.

If you desire success in the dye-  
ing operation, and wish to save  
money, use Diamond Dyes for home  
dyeing. All up-to-date dealers sell  
Diamond Dyes and strongly recom-  
mend them.

### Literary Notes.

As usual the Colonist in its last  
issue is full of timely interest. The  
frontpiece of a beautifully illus-  
trated number is an excellently  
conceived representation of the sit-  
uation in the Klondyke, symbolized  
as "King Klondyke," who is seated  
in all his frigid glory of snow and  
ice, with a big bag of gold on one  
knee but a very small bag of flour  
on the other. The town of Carman  
and the municipality of Dufferin  
are the subjects of a long write up,  
profusely illustrated with many  
views of town and country scenery.  
That part of the prairie province  
has never before been so well de-  
scribed and illustrated, and the resi-  
dents of the municipality have  
something to send home to their  
friends that they may well be proud  
of. Other features of interest in  
this excellent number are an in-  
teresting story dealing with life in  
the Northwest, called "Love and  
Chickens," a forcible article on  
"One Way to Attract British Cap-  
ital," and a timely one on "Our  
Share in the Klondyke."

The wonderful change noticeable  
in the last few issues of the Cana-  
dian Home Journal still continues,  
and it is rapidly striding to first  
place among the home magazines  
of the day. Everything is beauti-  
fully illustrated, making one of the  
prettiest and most interesting num-  
bers given us by this very up-to-  
date journal.

The annual report of the Mani-  
toba Historical and Scientific so-  
ciety for 1896 is accompanied by  
two interesting papers, one from

## OUR DEAR ONES.

Mothers, Wives and  
Daughters.

Thousands of Them Suffer.

Paine's Celery Compound Gives  
Them Health and the  
Freshness of Youth.

When the nervous energies are  
exhausted, women suffer from con-  
stipation, dyspepsia, kidney disease,  
liver trouble and prostration. They  
are weak, tired, have headache,  
backache, side-ache and cannot sleep.  
It is then that the wrecking of  
woman's delicate organism begins.

When sickness, disease and dis-  
aster threaten, Paine's Celery Com-  
pound should be used without de-  
lay. This marvellous modern  
medicine will quickly impart  
strength to every weak organ, and  
restore the greatest blessing of life—  
health. A few weeks' use of  
Paine's Celery Compound will give  
vigor to the nervous system; nutri-  
tion, digestion and every special  
womanly function will be natural  
and regular. Rosy cheeks, spark-  
ling eyes and the freshness of  
youth and beauty always follow  
the health-giving influences of  
Paine's Celery Compound.

the pen of Rev. R. G. MacBeth,  
entitled, "Farming in the Selkirk  
Colony," and the other by Prof.  
Bryce, on "The Lake of the Woods,  
its History, Mining and Manufac-  
turing."

The first number of Price Current,  
a weekly record of the latest mar-  
ket prices affecting all branches of  
trade in Western Canada, to hand.  
It is published by the Colonist  
Printing Co., Winnipeg.

The November issue of the De-  
lincator, called the early winter  
number, contains, among its many  
good things, nearly 100 pages de-  
voted to styles for late autumn and  
winter.

### ON THE STREET.

Scene—King street, Toronto.—The Globe,  
Aug. 17th, 1889.

The little roughened legs were clad  
In stockings nature gives to all.  
No shoes—no, neither good nor bad.  
And his thin form was far too small  
To suit the vesture that he wore;  
Beneath his little cap a store  
Of curled locks his brow had graced,  
But unkempt; with eagle feet  
A new-boy thus alerly paced  
His way along the city street.  
With stock in trade, he entrance gained  
A restaurant where fashion reigned.

Here at a sumptuous table sat  
A youth—in fact a city swell,  
With taste aesthetic, what of that?  
'Tis of his act that we would tell,  
Of how the little fellow gazed  
With glad surprise as if amazed  
And seemed bewitched, as waiting not  
This man so exquisitely fine.  
This votary of fashion's shrine,  
Did order supper nice and hot,  
And had it served, a feast of joy,  
To this poor little hungry boy,  
Not in a nook on dirty delf  
But at the table with himself.  
Set out the picture full in sight,  
Surround it with the clearest light,  
Such scenes our better thoughts employ,  
A scene to give an angel joy  
As here this man of fashion sat  
And right before him little Pat,  
Guelph. —T.L.

**DR CHASE'S  
KIDNEY-LIVER  
PILLS**

MR J H REEMER, C.P.R.A.,  
Windsor, Ont., says he was  
troubled with Dyspepsia, and  
Kidney and Liver trouble for  
about 3 years. He took Dr. Chase's  
K.L. Pills. They cured him and  
now he recommends them to  
others.

HENRY MOORE, P. Kering,  
Ont., says that for Constipation  
and Stomach Troubles he never  
found the best of Dr. Chase's  
K.L. Pills. He suffered many  
years, tried various remedies, but  
none gave the same relief as Dr.  
Chase's.

### The Queen of Top Draught Heating Stoves

It will save you 25 to 50 per cent fuel. Only stove made with draft on  
top. Cleanest stove made. No ashes or fire can get on floor. Only stove  
absolutely safe. The Queen Heater is more of a heating machine than it is a  
stove. It can be regulated like a lamp. You can have your room any tem-  
perature you wish. Will positively keep a slow burning fire 48 hours by put-  
ting in one large stick or knot. Will heat a room 20 feet square in ten min-  
utes in cold weather, or no sale. Absolutely air tight and the cleanest stove  
in the world. No opening of any kind—no ashes, dust or soot can get out.  
No trouble to operate. One fire lasts all winter if you will put in a stick of  
wood every two or three hours. Keeps fire all night—any night and every night, is  
a handsome stove, he outside being Russia iron, lined with steel, and needs no  
blackening. The most powerful heating stove, and yet will save half the fuel of  
the average stove. Burns in gas knots, chunks, chips, cobs and trash. Never  
require to remove the ash, only once every one or two months. No ashes to  
sieve and spoil a good suit of clothes. Will take stick 24 inches long by 10  
inches thick. Never wants the wood set up—you save that expense. It  
burns your wood in large chunks; it makes a regular heat and lasts longer.  
Is the greatest fire keeper in the world. Those sold already in the district  
have given grand satisfaction. PRICE \$12. For sale by

## LIFE'S PATHWAYS.

If to life's prosperous paths we tread  
With glorious sunshine overhead,  
Or in the way of want and care,  
With danger often lurking near;  
If of sorrow, weal or woe;  
If of endless happiness to know,  
Or smooth our way or rough and cold,  
Remember yet rest, peace untold.

Along the great highways of earth  
Are heard full oft the sounds of mirth;  
And the wails of wild despair  
Are far and near the ambient air.  
Life is a swiftly changing scene,  
Here mystery dark, there sudden gleam,  
Here through the mists hop, back, on, on,  
Till past the clouds still shines the sun.

Oh, rest and peace! Oh, faith sublime!  
Our weary feet may scarce keep time  
To these sweet strains that emanate  
From the soul from heaven's gate.  
The onward now, lo! is in sight,  
A gentile there still is light,  
And though the course be marked with strife  
We gladly choose the path of life.

—Oscar B. Smith, in N.Y. Observer.

## MR. WILSON'S SUPPLY.

"If I could only go out and do something to help to earn money," said Mrs. Wilson, wistfully.

Mr. Wilson laughed fondly, as one shows amusement at the vagaries of a child, and patted his wife's cheek playfully.

The idea of a little woman, who has been sheltered all her life, as you have, going into the world as a money-getter. You make a first-class wife and mother, but that doesn't demand a knowledge of the principles of business. No, we will get along with what the man of the house is able to earn, even if we cannot buy the corner lot; so do not let your mind stray from the province in which you dwell so successfully to work that you would not be able to perform. Mr. Wilson does not need a business head."

As her husband left the house Mrs. Wilson walked to the window and looked after him, with her mouth drawn into a firm, scarlet line.

"So I do not need a knowledge of business principles," Asbury Wilson said, she apostrophized his retreating form. "You must have forgotten that I have had to make use of them for a number of years; that twice a year I look up the tax receipts and pay the money, often out of my own spending money; that I look after all our insurance; that I always kept up the interest on the mortgage until we paid it; that I keep all the accounts of the family; and that every claim is submitted to me for payment, to say nothing of the business knowledge necessary to make one dollar do the work of two—a problem that a man seldom tries to solve. It's all right, of course, and I must put up with being a business cipher; but if there is anything in the doctrine of reincarnation, I hope you will be reborn as a woman, to see if brains are not as necessary for a wife and mother as for a husband and father."

After this spirited speech, Mrs. Wilson went about her work, which, that morning, was the construction of a stylish spring jacket for 12-year-old Edna out of Mr. Wilson's light overcoat of two seasons back, meaning a saving of from eight to twelve dollars towards the June tax assessment.

Mr. Wilson occupied the position of traveling salesman for a grocery house, and had been able to provide his family with a comfortable home and a good living. It was no business crisis that brought forth Mrs. Wilson's wish to earn money, but the chance to purchase a certain piece of property at a most advantageous price. She could see the advisability of such a transaction, and of her desire to see the investment made was born her wish. Mr. Wilson was proud to term himself a "self-made man," and the idea that his wife's work might have a commercial value, or that he might be compelled to receive such aid from her, would have been distasteful to him. He was a most generous man, giving freely and unasked, yet always conveying the feeling that he considered the money used by the family as his alone.

Through all the afternoon Mrs. Wilson could not help a little feeling of resentment against her husband for so coolly setting aside the idea of her capability; but the feeling vanished suddenly, when, at supper time, a closed back drove to the gate, and two men took from it a stretcher. She flew to meet them, and the man they were carrying opened his eyes to say to her:

"It's only a broken leg, Chic, don't be frightened."

It proved to be "only a broken leg," but how serious the affliction really be to him, she only knew late that night, after the broken bones were set, and the doctors gone.

"The worst of it is, Chic," he said, dolefully, between groans, "I was to start tomorrow on that two weeks' trip up north, and it's the most important one of the season. It takes in great Bow, Hinesville, Robinson and several other smaller towns, all comparatively new to our house, and I had timed my dates just ahead of the man from the Occidental Grocery Company. He'll get everything for them, for the house won't have time to send a supply in my place, and it may be the means of putting me on a power route, since I lost last month for them, because of that la grippe."

In spite of his wife's efforts to quiet or cheer him, the man worried himself through a restless and feverish night. The next morning when he opened his eyes, Mrs. Wilson stood beside him in her outdoor costume.

"I've found your supply, Asbury," said she. "I sent over for mother last night, you know, and she was sure to find it."

"You mean the medicine?"

"Yes, the medicine. I sent over for mother last night, you know, and she was sure to find it."

"You mean the medicine?"

"Yes, the medicine. I sent over for mother last night, you know, and she was sure to find it."

"You mean the medicine?"

of the medicine which is concealed within. Take it to pieces and show him each part separately—he will recognize neither design nor adaptation nor relation between them; but put them together, set them to work; point out the offices of each spring, wheel and cog, explain their movements, and then show him the result. (Now he perceives that it is all one design—that, notwithstanding the number of parts, their diverse forms and various offices, and the agents concerned, the whole piece is of one thought, the expression of one idea.) He now rightly concludes that when the mainspring was fashioned and tempered its relation to all the other parts must have been considered; that the cogs on this wheel are cut and regulated—adapted—to the cogs on that, etc., and his final conclusion will be that such a piece of mechanism could not have been produced by chance; for the adaptation of the parts is such as to show it to be according to design, and obedient to the will of one intelligence.—Harper's Round Table.

"Indeed I do, Asbury," said she, undaunted by the horror in his face and voice. "I can go to the ground, and if I don't do as well as you would, I will save the route for the house and you, anyway. It is two hours yet until train time, and I can sit here for an hour and a half, with your lists and books, and find out where to go, and how to handle each man, and about the prices—though I have helped you so often with your writing that I could find out about the prices myself, I think."

"But, Chick," interposed Mr. Wilson, "you don't know what you are offering. You'll have to travel on crowded trains, and put up at strange hotels, and talk to the grocers themselves. You've led such a sheltered life that you don't realize anything that would be expected of you."

"I've travelled on crowded railway trains more than once, Asbury, when I had three babies to take care of, and had to drag them around while I bought tickets and rechecked baggage, and I've put up at strange hotels with them, too; and as for talking to grocers—if I haven't learned how to do that, after fourteen years of marketing, I need this experience to teach me. Oh, it's no use, Asbury, I am going, and you needn't waste any more of our hour and a half in arguing the question. There is a better nurse than I am, and the children love her so that they will be as good as gold, so none of my duties will be neglected. Here are your books and papers; hurry and tell me what I must do about things."

"Mr. Wilson spent a lonely and worried two weeks, though in the bottom of his heart, he did not doubt that his wife would be successful—he had seen her meet too many perplexities to lack confidence in her ability. In his heart, also, he knew that all his assumption of her dependence upon his superior judgment was but a pretty play of his own, whereby his value to her seemed enhanced."

Promptly to the day, Mrs. Wilson returned, bright and fresh from what had been to her a vacation from the indoor life she had been leading, joyous at seeing the family, and elated at her success, as the well-filled pages of the order book testified.

"Only two of your customers refused to buy of me, Asbury," she announced quite breathlessly, as she relieved herself of the details of her venture, "and they were old Mr. Green of Hinesville, who reckoned he'd wait for the Occidental Company's man, and a man up at Great Bow, who talked through his nose, and who said he 'didn't consider no woman fit to sell groceries.' The rest were all so polite—at first, I think, because I was a woman, but afterwards they really seemed to like to order from me, and as I have had practical experience with so much of the goods that you carry, I could add my knowledge to what you told me, and so my orders grew amazingly."

Mr. Wilson was enthusiastic over his wife's success, the thought went through his mind that when a rosy little woman, with bright eyes and a dimpled chin, held the order book, a merchant would need some of the adamant in his nature to keep his orders from growing.

During the weeks that he was confined to the house, Mrs. Wilson came and went over his route, with the result that when he could take his place again, the firm for which he worked sent an offer of steady employment to M. A. Wilson, the non-committal name that Mr. Wilson's supply had signed to her orders, with the astonishing information that she was "just the kind of a man they had been wanting."

Did she go? Not because, you see, this happened in real life, where duty and poetic justice do not go hand in hand. She went back to her home and babies, to the remodeling of old clothes, and the cooking of groceries instead of the selling of them.

"I might be able to hire a housekeeper," said she, "but never a mother, nor an economist. It takes business judgment to be a housekeeper, wife, mother, nurse, dressmaker and general economist, all in one, just as it does to run a government, or to sell groceries."

"You're right, Chick," said Mr. Wilson, approvingly, "and a great deal more, I think, for here is a housekeeper who can sell groceries, and here is a salesman who couldn't be a housekeeper. And you deserve a salary for your work, just as I do for mine, so hereafter, half the income of this family is your own, and I'm ashamed that I had to be brought to a proper sense of the value of your work by such an experiment as this, though I must say that I deserved it all."

Which was a great deal for Mr. Wilson to say, and, altogether, quite the most satisfactory thing, also, from Mrs. Wilson's point of view.—Woman's Journal.

Interdependency of Inventions.

The advent of important and valuable inventions is often dependent not upon the brilliant inspiration of some individual inventor, but upon the general and gradual advance of the state of the art to which they belong, making their occurrence not only possible, but almost inevitable. The bicycle is an excellent example of this kind of growth in mechanical construction, since, while it is one of the most important things, both mechanically and commercially which has ever been produced, it owes its development to the parallel improvements in metal and rubber, working without which it could never have existed at all, in the modern sense, or to any extent.

The clumsy wooden velocipede would always have remained a useless toy and not the introduction of drawn steel tubing made the construction of a light, and yet strong frame possible, while the original leather tire of Dunlop could never have led to the practical application of the pneumatic principle without the substitution of the rubber construction, which only the advances in rubber manufacture made possible. This is but one instance of what is apparent in many other lines of work, and there is little doubt that, if the patent records of the past 50 years were thoroughly studied by competent specialists, many inventions, which at the time of their conception were failures simply because of the impossibility of executing the ideas, would now be found both practicable and valuable.—Cassier's Magazine.

How to Examine a Watch.

To one who has never studied the mechanism of a watch, its mainspring or the balance wheel is a mere piece of metal. He may have looked at the face of the watch, and while he admires the motions of its hands and the time it keeps, he may have wondered in idle amazement as to the character

of the mechanism which is concealed within. Take it to pieces and show him each part separately—he will recognize neither design nor adaptation nor relation between them; but put them together, set them to work; point out the offices of each spring, wheel and cog, explain their movements, and then show him the result. (Now he perceives that it is all one design—that, notwithstanding the number of parts, their diverse forms and various offices, and the agents concerned, the whole piece is of one thought, the expression of one idea.) He now rightly concludes that when the mainspring was fashioned and tempered its relation to all the other parts must have been considered; that the cogs on this wheel are cut and regulated—adapted—to the cogs on that, etc., and his final conclusion will be that such a piece of mechanism could not have been produced by chance; for the adaptation of the parts is such as to show it to be according to design, and obedient to the will of one intelligence.—Harper's Round Table.

"Indeed I do, Asbury," said she, undaunted by the horror in his face and voice. "I can go to the ground, and if I don't do as well as you would, I will save the route for the house and you, anyway. It is two hours yet until train time, and I can sit here for an hour and a half, with your lists and books, and find out where to go, and how to handle each man, and about the prices—though I have helped you so often with your writing that I could find out about the prices myself, I think."

"But, Chick," interposed Mr. Wilson, "you don't know what you are offering. You'll have to travel on crowded trains, and put up at strange hotels, and talk to the grocers themselves. You've led such a sheltered life that you don't realize anything that would be expected of you."

"I've travelled on crowded railway trains more than once, Asbury, when I had three babies to take care of, and had to drag them around while I bought tickets and rechecked baggage, and I've put up at strange hotels with them, too; and as for talking to grocers—if I haven't learned how to do that, after fourteen years of marketing, I need this experience to teach me. Oh, it's no use, Asbury, I am going, and you needn't waste any more of our hour and a half in arguing the question. There is a better nurse than I am, and the children love her so that they will be as good as gold, so none of my duties will be neglected. Here are your books and papers; hurry and tell me what I must do about things."

"Mr. Wilson spent a lonely and worried two weeks, though in the bottom of his heart, he did not doubt that his wife would be successful—he had seen her meet too many perplexities to lack confidence in her ability. In his heart, also, he knew that all his assumption of her dependence upon his superior judgment was but a pretty play of his own, whereby his value to her seemed enhanced."

Promptly to the day, Mrs. Wilson returned, bright and fresh from what had been to her a vacation from the indoor life she had been leading, joyous at seeing the family, and elated at her success, as the well-filled pages of the order book testified.

"Only two of your customers refused to buy of me, Asbury," she announced quite breathlessly, as she relieved herself of the details of her venture, "and they were old Mr. Green of Hinesville, who reckoned he'd wait for the Occidental Company's man, and a man up at Great Bow, who talked through his nose, and who said he 'didn't consider no woman fit to sell groceries.' The rest were all so polite—at first, I think, because I was a woman, but afterwards they really seemed to like to order from me, and as I have had practical experience with so much of the goods that you carry, I could add my knowledge to what you told me, and so my orders grew amazingly."

Mr. Wilson was enthusiastic over his wife's success, the thought went through his mind that when a rosy little woman, with bright eyes and a dimpled chin, held the order book, a merchant would need some of the adamant in his nature to keep his orders from growing.

During the weeks that he was confined to the house, Mrs. Wilson came and went over his route, with the result that when he could take his place again, the firm for which he worked sent an offer of steady employment to M. A. Wilson, the non-committal name that Mr. Wilson's supply had signed to her orders, with the astonishing information that she was "just the kind of a man they had been wanting."

Did she go? Not because, you see, this happened in real life, where duty and poetic justice do not go hand in hand. She went back to her home and babies, to the remodeling of old clothes, and the cooking of groceries instead of the selling of them.

Smoking Tobacco?

Local and General

—Mr. M. Kennedy of Regina, is in town.

—Mr. J. Price and family have removed to Indian Head.

—The Atlantic mail contract is awarded to the Beaver line.

—Mr. J. Doolittle's new furniture warehouse is nearly completed.

The heri law went out of force for the time being, on Monday last, Nov. 1st.

—Mr. C. Fetherstonhaugh, Fort Qu'Appelle, registered at the Leland yesterday.

—Church of England services will be held at Mr. E. J. Paine's on Sunday at 3 p.m.

—Mr. W. Gibson, Sr., has disposed of his best little mare "Molly," to Mr. McNaughton, of the Massey-Harris Co.

—Parties wishing to winter cattle apply to R. Johnston at once, as he has 500 head of steers to put out to winter.

—The address in reply to the speech from the throne was adopted without opposition in the Northwest assembly.

—Van Wyck, the Tammany candidate, is elected mayor of Greater New York, by 75,000 to 100,000 majority.

—Isn't it about time our curlers were getting a hustle on? The Heather club will need to look to its laurels this year.

—Mr. W. Kirkland has an auction sale on Saturday at Indian Head. He will leave on Tuesday for the Old Country, where he will reside in future.

—Dr. W. D. Cowan, dentist, Regina, will visit Qu'Appelle on Nov. 10 and 11, staying at the Queen's, for the practice of his profession.

—Mr. J. A. MacCaul has opened his new furniture business at the Head. We wish him good luck and hope he has struck a Klondyke.

—The Lord Bishop of Qu'Appelle will administer confirmation at St. Peter's cathedral on Sunday, Nov. 21st, instead of the 23rd, as previously announced.

—Mr. John Griève, while engaged in adjusting the stove pipes in the new school on Saturday, had the misfortune to fall, seriously injuring one of his fingers.

—A lawsuit over the estate of the late H. A. Massey, the implement man, is threatened. The trouble arises between the children and grandchildren of deceased, as to the disposition of their respective legacies.

—We have received through the courtesy of our member, Mr. Bul-yea, a copy of "An Ordinance to amend and consolidate as amended the law relating to elections," and "An Ordinance respecting the public service of the Territories."

Wheat on Saturday jumped to 78c and on Monday dropped to 77c. The farmers have evidently taken advantage of these prices and the fine weather to hustle, and as a consequence several bins in the elevators are chock full and one or two of the buyers have been obliged to suspend operations till cars can relieve the glut. On Monday afternoon the Indians from Mr. Hockley's agency filled the streets with loads of wheat. The red man is getting as civilized as his white brother, and every whit as sharp on

a bargain. The wheat this year on the reserves is a good sample and the Indians are to be congratulated on the prices realized.

Yonge St. Fire Hall.  
Toronto, March 16th, 1897.  
Gentlemen—I have used Dr. Chase's Kidney-Liver Pills for Biliousness and Constipation, and have proved them the best that I have ever used—will use nothing else as long as they are obtainable.—Remaining yours, respectfully, E. C. SWEETMAN.

—His Honor Judge Richardson, accompanied by Messrs. D. Watson and Sheriff Benson, drove out to the Fort on Tuesday to open court; from there they proceeded to Indian Head, and returned to Qu'Appelle last evening.

—Mr. J. Moxon of Blackwood, was found on the Qu'Appelle Valley hill road on the 23rd ult., in an unconscious condition. It is supposed he was thrown out of his rig on the previous evening. He has since lain in a most serious state.—Vidette.

A Running Sore Pronounced Incurable by Eight Doctors—Cured by Dr. Chase.

Mr. R. D. Robbins, 148 Cowan Avenue, Toronto, says: "I had a bad leg which was simply unsightly. From below the knee to the ankle was one great sore. Eight doctors treated me without benefit. I was induced to try Dr. Chase's Ointment, which cured me, and all that remains to be seen are the scars."

—Mr. W. Waite, the popular C.P.R. agent at this place, has gone to Regina to take charge in the absence of Agent Birbeck, who has gone to Rat Portage under orders. It is thought this means promotion for Mr. Waite, and we hope it does, but we shall be sorry to lose him.

—At the door of the shop lately occupied by Mr. S. Collins, the shoemaker, someone deposited a small pair of shoes to be repaired. They remained there several days when the owner no doubt took a tumble that Sam was out and would not return in 10 minutes.

THE KLONDYKE'S WEALTH

Would be no Inducement to the Sufferer if it Stood Between Him and Perfect Health.

H. H. Little, Campbellford, writes: "About one year ago I had a severe attack of typhoid fever and it left my system in a very weak and nervous condition, in fact, so badly that I despaired of recovery. I was induced to try South American Kidney Cure, and when I had taken a few bottles I was completely cured and have better health since than for years before."

Sold by Henderson & Parker.  
—The country editor is a reliable encyclopedia. A subscriber sent him this query: "What ails my hens? Every morning I find one of them keeled over, to rise no more." The reply was: "The fowls are dead. It is an old complaint, and nothing can be done except to bury them."

—The Y.P.S.C.E. meeting on Monday evening last in the Presbyterian church was the largest so far held here. The next meeting will be held in the Methodist church. Topic for consideration, "Influence." Everyone invited.

—Lost from Rapid City, a boy about fifteen years of age, medium size, fair complexion, named Fred Mordinger. He was dressed in a pair blueish check overalls, white flannelette shirt, soft gray felt hat, no vest or coat. Send information to Reporter office.

—The Vidette, Indian Head, has changed hands, Dr. Cowan of Regina, and Mr. McCra of the Grenfell Sun are the purchasers. The Yorkton Enterprise has been leased by Messrs. Dermody & Edwards of the Saltcoats Siftings, who will publish both papers in future. Mr. Peaker, editor of the Enterprise will still occupy that position.

—A young man giving his name as John Henry Thomas, hailing from Oakville, Ont., was given

Awarded  
Highest Honors—World's Fair,  
Gold Medal, Midwinter Fair.

DR.

BAKING  
POWDER  
A Pure Grape Cream of Tartar Powder.  
40 YEARS THE STANDARD.

shelter in the police barracks on Tuesday night. It seems he has been working for a threshing outfit and became ill, and came to Qu'Appelle. After spending what money he had, some two dollars, in medicine and knick-knacks, he began wandering round town, and as he appeared to be in a half-demented condition, it was thought best to have him taken in charge.

A PAIN CRIPPLE

Tortured and Tormented With Rheumatism and Sciatica—South American Rheumatic Cure Works the Wonder.

Mrs. John Fisher, Woodstock, N.B., writes: "I had been suffering for over three years from muscular rheumatism and on one occasion I had a very acute attack of sciatica. For several weeks I was unable to walk or attend to my household duties. Tried several remedies and physicians failed to give me relief. I saw South American Rheumatic Cure advertised and bought a bottle. It did me a wonderful lot of good. Four bottles effected a perfect and permanent cure."

Sold by Henderson & Parker.

Markets.

Qu'Appelle, Assn., Nov. 2.  
There appears to be quite a rivalry between the dealers here and we quote the lowest price. Wheat on Saturday sold at 78c, Monday 77, Tuesday 76, Wednesday 75, and to-day at 74c. Wool varies as to quality, poles running from \$1.50 to \$2.50 per load.

THE GOLD RUSH

Is Not More Enthusiastic Than are the Prairies of the Thousands Who are Living To-day Because of South American Kidney Cure.

Thousands verify what is claimed of South American Kidney Cure. Greatest, safest, quickest acting, permanent results. A specific for kidney disorders in young or old, male or female. It enjoys the distinction of a hearty recommendation by most eminent physicians. It relieves distressing kidney disease in six hours. Never fails to cure if persisted in. Acts directly on the circulation and eradicates from the system all solid and foreign substances which clog up these sanitary organs of the human anatomy. You test what others have proved. These words from a letter received to-day: "I despaired of recovery until I used South American Kidney Cure."

Sold by Henderson & Parker.

Answered as He Expected.  
"That was a sensational prayer Dr. Gummis delivered the other Sunday. I wonder if he expected it to be answered?"

"Certainly. And it was, too. Why, nearly every paper in the country replied to it."—Brooklyn Life.

Continue to Grow

Tom—I was out slumming to-day, and passed through the worst section of the city.  
Dick—You are liable to be arrested.  
Tom—What for?  
Dick—For passing bad quarters.—Up-to-Date.

Had to Get Away.

"My daughter has earned a big commission, but I suppose she can't collect it."

"How did she earn it?"

"Since she began her vocal lessons every neighbor on the block has bought a wheel."—Chicago Record.

Wallace—There is nothing like matrimony to make a man appreciate the value of money.

Ferry—That's so! A dollar a man gives to his wife looks bigger to him than any other dollar.—Cincinnati Enquirer.

Osgood—Do you believe in hypnotism? Dowley—I do. E. C., time I look at my wife and hear her talk I become more positive that I must have been hypnotized when we were married.—Cleveland Leader.

Mrs. Gableton—I understand that your husband cannot meet his creditors.

Mrs. Fules—On the contrary, he says he can't help meeting them at my turn. That is the reason he goes out so seldom.—N.Y. Journal.

Jenkins—Why do people have such a propensity for getting in debt?

Simkins—Because it's about the only thing there is any money in.—Town Topics.

Miles—At Vernon, on the 2nd inst., the wife of Mr. A. H. Miles, of a son.
